

It IS Easy Being "Green"

Go "Green"

Whether you are looking to minimize paint odor for tenants, earn LEED credits, extend the life of your building's exterior, or just become more environmentally conscious, AAA has a "green" solution for you.

Use Your Space Sooner

Traditional wall and floor coverings produce odor and toxins in the environment. This often generates tenant complaints or renders an area unusable for some time. Low and zero-VOC wall and floor coverings produce no odor so tenants can occupy the space during, or soon after, a renovation. These "green" options are available in any color.

Reduce Maintenance Costs

Re-covering your exterior with composite or synthetic materials saves on future maintenance costs and extends the longevity of the structure. Plus, you have the satisfaction of using renewable and sustainable resources from the environment.

Earn LEED Credits

If you are looking to become LEED certified or require LEED credits, AAA's "green" practices and variety of environmentally-friendly solutions will help you achieve your goals.
