

Epoxy Flooring

Protect Your Investment

Floors undergo much wear and tear. Coating with epoxy or urethane products will protect the floor from chemical corrosion, oil spills, wear & tear, scratching and damage. AAA's Epoxy Coating Team will help you extend the life of your concrete, while providing a cleaner, healthier, and more pleasant environment.

Improve Safety

Brighter work areas, anti-skid surfaces and controlled concrete dusting all lead to improved safety. AAA installs Epoxy Flooring for many hospitals, laboratories, commercial kitchens, cold rooms, and restroom facilities because it is easily cleaned and sterilized. Epoxy coatings and striping create workspaces that are safe, bright, clean, and efficient.

Reduce Maintenance Costs

Urethane and epoxy floors increase light reflectivity by up to 300% which will brighten the space, maximize productivity, and even cut down on utility expenses. AAA's experienced Epoxy Coating Team will help you reduce your floor maintenance, cleaning costs, and replacement needs.

Epoxy Flooring Specialties
