

# Fire & Water Emergencies... Will You Be Ready?

## 3 Steps to Prepare for the Unthinkable

### #1 Know Who You're Going to Call

The day of a fire or flood is not the time to start looking through the phone book to find a Restoration expert. Establish a relationship with a reputable company **BEFORE** you need them.

Then, program their 24-hour emergency phone # into your cell phone. After 911, this is the next call to make.

**TRG: 630.580.5584**

### #2 Know What to Expect—1<sup>st</sup> 48 Hours

TRG's Rapid Response Team will arrive quickly, ready to assess the damages and safely begin emergency services. From water extraction to board up services, TRG will secure the property from further damage.

TRG will then work with insurance companies to quickly provide documentation and help move the restoration process along.

### #3 Be Patient for First Rate Results

After an emergency, everyone wants things back to normal as quickly as possible. Sometimes insurance investigations, repairing the root cause of the emergency, or scheduling multiple contractors can extend the complete restoration process. Make sure your contractors aren't trying to just get "in and out". TRG works with you to keep the "big picture" in mind. The complete restoration may take some time, but the end result will be First Rate.

**TRG brings confidence and peace of mind to your restoration project!**

**TRG's experienced crews provide:**

- 24-hour emergency service
- Board up protection
